-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION**Specification**

The abstract of the disclosure is objected to because of grammatical errors. In line 7, the phrase "the pattern portion" is unclear to which pattern portion is being described. The Examiner believes applicant means -- the second pattern portion --. In line 8, insert -- the -- before "third" and in line 9, change "colored" to -- colors --. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities: On page 2 of applicant's disclosure, line 2, change "print" and "mother" to -- printing -- and -- other -- respectively. Further in lines 15-17, make similar changes as set forth in the grammatical errors find in the abstract above. Appropriate correction is required.

Claim Objections

Claims 1-3 and 5 are objected to because of the following informalities:

Regarding claim 1, in lines 7-9, correct the grammatical errors as described under the **Specification** heading above.

Claim 2, line 2, insert -- a -- before "first process".

In claim 3, line 3, change "next" to read -- a second -- or -- a following --.

As for claim 5, change misspelling "seted" to read -- set --. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 6,195,830 to Bruschi. Bruschi discloses a multi-colored handle (1) structure for a paintbrush, along an axial direction (8) of the handle a body (3) extending outward from the handle, the handle comprising; a hard-plastic first core section (13) integrally molded with a second hard plastic core section (17) and a third soft layer (16) coated thereon (col. 3, ln 60), the first core section having a hard first pattern portion or emblem (14b), the second core section having a hard second pattern portion (10), wherein the first pattern portion and the second pattern portion are not coated by the third layer; the first pattern portion, the second pattern portion and the third layer are different in color and form a smooth surface of the handle.

As to claim 2, the first core section is formed in a first process of ejection molding. The first core section is defined with a passage (4) along the central axis. Opposite the first pattern portion is a sunken portion at (11) which is defined by opposing arcuate grooves at a distal end of the handle as seen in Fig. 1, such that the handle includes corresponding sectional area.

As to claim 3, the second core section includes an annular protrusion (14a) defining an annular seat or groove near the proximal end of the handle.

Art Unit: 3677

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In particular, Mader et al, Tipper et al and Wildforster all disclose tool handle devices and the method of making the handle grips by molding techniques within the art. These references may be used singly or in combination thereof to meet the limitations of applicant's claims.
